

Hi Brandon,

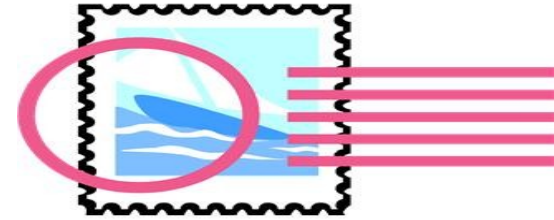

I am currently touring the amazing Easter Island. There are so many sights to see! Today we got to check out the human statues.

Easter Island is on the Pacific Ocean, almost 4000 miles away from Chile. Did you know that there are over 600 GIANT human statues? You've got to see this for yourself!

Some of the statues get up to 13 metres high, that's taller than both of us combined. Some are even crowned with stones that weight 27 tonnes! These statues were carved approximately 2700 years ago. You wouldn't believe what I'm seeing!

See you soon,  
*Christian Andulan*

P.S I'm darker than ever now.
